

Doctors Community Hospital, USA

Vistamatic® the worlds leading manufacturer of glazed secure vision panels has been commisioned with supplying almost 100 units for the Doctors community hospital hospital.

The multi – million pound refurbishment occupying 70.000 square feet was completed in 2010 with Vistamatic® units featuring throughout the wards.

Located in an urban center, Maryland General faces many challenges as a community hospital that needs to respond to low income, middle income and high income residents on all sides as redevelopment continues. The Central Care project will provide new operating rooms as well as new ICU and IMC units.

Worked with doctors, nurses and staff to design new operating rooms large enough to accommodate state-of-the-art equipment required for today's surgeries.
